

Lighting Design Group

SELECTED PROJECT EXPERIENCE COMMERCIAL - AMERICAS

CD+M Lighting Design Group is an international lighting design consultancy comprised of designers whose work encompasses a variety of markets. Our award-winning design team has extensive experience creating innovative custom lighting plans to enhance architectural environments. Our clients include leading architects, interior designers and developers in more than 20 countries worldwide.

With staff in the US, UAE, UK and PRC, our designers are fluent in multiple languages, maintain close ties to global manufacturers and suppliers and have an excellent understanding of how to integrate lighting into both architecture and landscaping.

JACKSON WALKER, DALLAS, TX

Jackson Walker LLP moved its Dallas offices to the KPMG Plaza at Hall Arts office building in the heart of the Dallas Arts District. The move provided enhanced efficiencies and amenities for the firm's clients and places Jackson Walker at the center of one of the city's most vibrant and exciting developments. Global architecture firm Gensler signed on to design the firm's offices, which will provide a more effective use of space and allow the firm to reduce its footprint by about 27 percent, and CD+M developed a maintenance and energy-conscious lighting scheme for the interior spaces of this LEED Gold Certified project.

CALFEE HALTER & GRISWOLD, CLEVELAND, OH

Seamlessly merging modern technology with historic design elements was of utmost importance when Cleveland's landmark Rockwell Building was converted into the new offices of Calfee, one of the city's oldest law firms. The nearly dilapidated building received a complete overhaul to create a structure that both pays homage to its original design and functions as a contemporary, thriving workplace. CD+M developed a maintenance and energy-conscious lighting scheme for the interior spaces of this LEED Gold Certified project.

MOTOROLA MOBILITY HEADQUARTERS, CHICAGO, IL

Working closely with Motorola, Gensler and CD+M created a space that integrates interior architecture with the latest thinking in technology, strategic workplace design, lighting controls and sustainable design. The project team achieved a rare LEED Platinum Certification by carrying out practical and measurable strategies. The new 600,000 SF workspace includes open, collaborative office spaces, an outdoor terrace, lab benching and production line equipment and several amenity spaces, including food service, a conference center and customer service center
