

Lighting Design Group

SELECTED PROJECT EXPERIENCE HISTORIC RENOVATIONS

CD+M Lighting Design Group is an international lighting design consultancy comprised of designers whose work encompasses a variety of markets. Our award-winning design team has extensive experience creating innovative custom lighting plans to enhance architectural environments. Our clients include leading architects, interior designers and developers in more than 20 countries worldwide.

With staff in the US, UAE, UK and PRC, our designers are fluent in multiple languages, maintain close ties to global manufacturers and suppliers and have an excellent understanding of how to integrate lighting into both architecture and landscaping.

CALFEE HALTER & GRISWOLD, CLEVELAND, OH

Seamlessly merging modern technology with historic design elements was of utmost importance when Cleveland's landmark Rockwell Building was converted into the new offices of Calfee, one of the city's oldest law firms. The nearly dilapidated building received a complete overhaul to create a structure that both pays homage to its original design and functions as a contemporary, thriving workplace. CD+M developed a maintenance and energy-conscious lighting scheme for the interior spaces of this LEED Gold Certified project.

PONCE CITY MARKET, ATLANTA, GA

Opened in 2014, Ponce City Market is a two million SF, LEED Gold development transforming Atlanta's landmark Sears Roebuck & Co. building into a dynamic mixed-use destination. The facility houses a variety of residential, office, dining and retail spaces in a single central locale. Situated in the middle of several thriving neighborhoods, CD+M provided lighting design for the entirety of the project scope including interiors, landscape & site, facades and parking decks.

MARTIN LUTHER KING JR. FEDERAL BUILDING RENOVATION, ATLANTA, GA

Constructed in 1933 as the main U.S. Post Office for Atlanta, the Martin Luther King Jr. Federal Building will soon house the Southeastern headquarters for the General Services Administration. The building carries the cultural distinction of being the first structure named in honor of the late Reverend Dr. Martin Luther King, Jr. The project, targeting LEED® Silver Certification, is a fusion of rehabilitation, renovation and environmentally conscious design. Sustainable design features include high efficiency mechanical and lighting systems and incorporation of daylighting strategies. These tactics will give the building an energy usage that is 15 percent better than code.
