

Lighting Design Group

SELECTED PROJECT EXPERIENCE PLACES OF WORSHIP

CD+M Lighting Design Group is an international lighting design consultancy comprised of designers whose work encompasses a variety of markets. Our award-winning design team has extensive experience creating innovative custom lighting plans to enhance architectural environments. Our clients include leading architects, interior designers and developers in more than 20 countries worldwide.

With staff in the US, UAE, UK and PRC, our designers are fluent in multiple languages, maintain close ties to global manufacturers and suppliers and have an excellent understanding of how to integrate lighting into both architecture and landscaping.

UNIVERSITY OF TAMPA SYKES CHAPEL, TAMPA, FL

Sykes Chapel and Center is an important part of the University of Tampa's renewed central campus quadrangle plaza, envisioned as the hub of student life. The chapel's design features a warmly lit, wood veneer vaulted ceiling that evokes cupped hands in prayer and one of the largest pipe organs in the U.S. CD+M developed a lighting scheme for Sykes Chapel and Center that uses energy efficient technologies to lower the building's overall consumption rate and decrease long-term maintenance costs. The lighting is integrated into the building's architectural folds, highlighting the striking details that characterize the space.

CATHEDRAL OF CHRIST THE KING ATLANTA, GA

The Cathedral of Christ the King is more than six decades old, and today the Cathedral is one of the ten largest Cathedral parishes in the country. As a precursor to a much larger expansion project, the building owners wanted to upgrade the lighting and controls for the sanctuary. The challenge was to increase light levels and create an ethereal ambiance without making any visible changes to existing infrastructure. CD+M designed a scheme that accents the features of the French Gothic interiors and enhances illumination, without any perceptible changes to the enclosure or visible light fixtures.

Before

After

SAINT JOHN NEUMANN, LILBURN, GA

The parish of St. John Neumann in Lilburn, Georgia had outgrown their facilities even before they opened in 1984. The master plan for incorporating an extensive addition to the pre-existing structure proposed a new 850-seat church building with classrooms, mechanical and storage spaces on the lower level, connected to the existing church building by an 80 F wide by 120 F long plaza. The lighting scheme developed by CD+M features two pairs of large custom chandeliers that define the processional, along with focused lighting on pews, the cross and the timber ceiling.
