

Lighting Design Group

## SELECTED PROJECT EXPERIENCE PUBLIC & INSTITUTIONAL - AMERICAS

CD+M Lighting Design Group is an international lighting design consultancy comprised of designers whose work encompasses a variety of markets. Our award-winning design team has extensive experience creating innovative custom lighting plans to enhance architectural environments. Our clients include leading architects, interior designers and developers in more than 20 countries worldwide.

With staff in the US, UAE, UK and PRC, our designers are fluent in multiple languages, maintain close ties to global manufacturers and suppliers and have an excellent understanding of how to integrate lighting into both architecture and landscaping.

### GEORGIA STATE CAPITOL IMPROVEMENTS, ATLANTA, GA

In 2005 the Georgia Building Authority completed a \$70 million multi-year restoration of the Georgia State Capitol building. Built in 1889, this landmark was modeled after the US Capitol Building and expressed Atlanta's new nationalism following the Reconstruction. CD+M used consistent colors to illuminate the building at night and highlight its striking architectural details. Designers overcame the challenges of working within an urban business district, including working around a helicopter flight path, to realize a design that enhances the building's classic architecture, compliments its shining gold domes and brings life to the once-lost statue at the monument's crown.

### GSA SOCIAL SECURITY ADMINISTRATION BUILDING, BIRMINGHAM, AL

The \$230 million US General Services Administration building houses more than 2,200 employees in nearly 600,000 SF. More than a traditional office development, the facility features a Main Street that includes a variety of unique administrative and employee spaces including a fitness center, high-tech mail center, full-service cafeteria, child-care center, credit union and auditorium. The area functions as the central focal point of the development, encouraging employee interaction to cultivate a positive workplace.

### FEDERAL AVIATION ADMINISTRATION SW REGIONAL HEADQUARTERS, FORT WORTH, TX

One of the country's largest government developments, the FAA's new environmentally sensitive build-to-suit headquarters will consolidate more than 1,300 of the FAA's current Southwest Region workforce. The unique design of this six-story building specifically addresses the FAA's needs to function under one roof, while the orientation and massing of the building optimizes sustainable qualities and daylight across the workplace. The highly efficient floorplate provides planning flexibility, access to views, and seamless integration of exterior courts with interior lobbies and breakout areas.
