Established in 1986, CD+M Lighting Design Group is an international lighting and controls design firm that provides professional services covering a full spectrum of architectural lighting design applications.

CD+M blends cutting-edge lighting expertise, energy-efficient architectural lighting techniques and years of construction experience to provide clients with highly creative, easy to maintain and sustainable designs. Our scope ranges from creating a conceptual sketch to developing turnkey technical designs including concept, design development, equipment purchase, contract negotiation and site supervision. We tailor our services to complement each client's creative vision, budget, and schedule.

CD+M has staff in Atlanta, Los Angeles and Dubai and numerous professional agreements with designers and engineers in Asia, Europe and South America. As an award winning global consultancy, CD+M boasts a diverse team of designers who have participated in the design and construction of more than 1,000 venues over the past 29 years. CD+M designers have an in-depth understanding of light's ability to create environments and influence human behavior and mood. The range of our team's talent and experience enables us to create innovative custom lighting solutions to enhance architectural spaces and reinforce design themes.

We are recognized worldwide for our excellence in providing lighting consulting services that are aesthetically pleasing, maintenance and environmentally conscious and sophisticated in application and technique. Our designers have received multiple prestigious awards for our work including several Guth Awards of Excellence, Best Project(s) of Year at Light Middle East, a Special Citation from the Illumination and Engineering Society of North America (IESNA) and multiple GE Edison Awards of Merit. In 1998, CD+M received the Lighting Designer of the Year Award by Lighting Dimensions International and was recognized in 2010 by INC Magazine as one of the 5000 fastest growing companies in the U.S. marketplace.

CD+M collaborated with a talented team of consultants and developers to design one of the first LEED® certified Core and Shell buildings in the U.S. and one of the largest LEED Platinum projects in the world at King Abdullah University of Science & Technology. We continue to be actively involved in the design of numerous and diverse LEED® and Estidama projects across the globe.
